

**Science**  
LEARNING CENTRES

## FREE COURSE

# National Science Learning Centre

## Vocational Science – Science in Engineering and Technology (NAT57)

**Date:** 10th -11th May 2007

**Location:** The National Science Learning Centre, University of York

**Target Audience:** Secondary science, technology and/or engineering teachers, FE Lecturers, Heads of Science

Many science topics are 'hidden' in other curriculum areas. This two day event will explore teaching and learning approaches and resources that will improve the teaching of science elements in Engineering and Technology curricula.

**The event will involve a varied programme of sessions that will include:**

- An investigation into the new '**Engineering Box**' produced for the National Teaching and Learning Change Programme for post-16 Engineering.
- How to find **ICT resources** to use in your teaching.
- An exploration into the use of 'java applet' animations in teaching
- How to use **new materials and resources** in teaching
- New approaches to teaching '**Health and Safety**' in the workshop
- How to **improve your Ofsted grade**

**We can now announce that this is a FREE course thanks to funding from the QIA. Full board accommodation is available at the cut price rate of **£25**.**

**To reserve your place book NOW.** Fax back the following form or visit our portal at [www.slcs.ac.uk/national/nat57](http://www.slcs.ac.uk/national/nat57). You will first be asked to register as a portal user, and then to apply.

**Total Fee:** £25 - This course is free and full board accommodation is available at the special rate of only £25.
